## Inverse Problems

sgpp.sparsegrids.org

Opt. problem: 2

Assumptions: 3

②

### B-Splines for Sparse Grids

explain w/ cake

Advantages: 2

- 
- 
- 
- 
- 

no lines

④

### Boundary Behavior and Not-a-Knot B-Splines

update with NAK

Vazipfl (in preparation)

⑤

### Bound. Behavior + NAK B-Splines

can be combined w/:

Vazipfl (in preparation)

⑥

### The Hierarchization Problem

$$f^S := \sum_{(i,j) \in K} \alpha_{i,j}^S \varphi_{i,j}^S(\vec{x}_{i,j}^S) = f(\vec{x}_{i,j}^S) \quad (4.4), (4.2)$$

$$\vec{y} = \mathcal{L}[\vec{u}] \quad \text{with} \quad (4.5)$$

$$\vec{y} = \vec{\alpha}, \vec{u} = \vec{f}, \mathcal{L} = \mathcal{A}^{-1}$$

Fig. 4.2.
